Financial Aid; Student Loan Programs; Tables (Data); Trend

Analysis; Work Study Programs

ABSTRACT

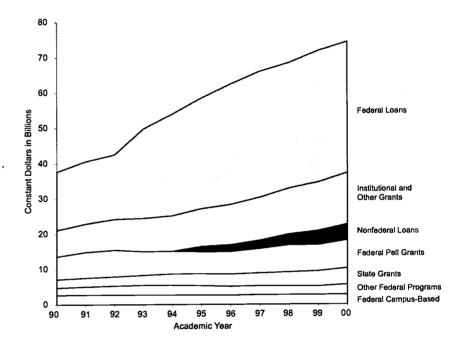

This report presents annual data on the amount of financial assistance available to postsecondary students in the form of grants, loans, and work-study. The objective of the report is to assemble the most complete, comparable, and reliable statistics on student financial aid for the 2000-2001 academic year and for years from 1963-1964 to the present. The study considers only direct aid to students. The most promising trend in student aid that this survey has tracked since the early 1980s has been the growing reliance on borrowing for higher education. Federal programs have largely fueled this trend, in that the federal government provides about 70% of direct aid to postsecondary students, and almost 60% of that aid is now in the form of loans. Available student aid topped \$74 billion in 2000-2001, an increase of 7.1% over the preceding year, or 3.5% after adjusting for inflation. Over the past decade, total aid has almost doubled in constant dollars, but the growing reliance on loan programs was responsible for two-thirds of this increase. Loan aid has increased by 136% during the past decade in constant dollars, while grant aid has increased by 64%. Data presented include: (1) aid awarded to postsecondary students in current dollars; (2) average tuition and fee charges; (3) number of recipients and aid per recipient for specific programs; (4) numbers of borrowers, loans, and average loan amounts; and (5) federal outlays on various student aid programs. Appendixes contain tables of aid awarded in current and constant dollars over the past decade. (Contains 10 figures and 14 tables.) (SLD)

INTRODUCTION

Trends in Student Aid presents annual data on the amount of financial assistance—grants, loans, and work-study—available to help students pay for postsecondary education. The College Board began this data series 18 years ago to track the value of such aid over time from federal, state, and institutional sources.

We are releasing *Trends in Student Aid* along with a companion report entitled *Trends in College Pricing*. The latter presents data from the College Board's Annual Survey of Colleges on undergraduate charges for tuition, fees, room and board, and other estimated expenses of attending higher education in the current academic year. We believe it makes sense to publish these two survey reports together. One provides the latest information on college charges and expenses. The other tells how much and in what form aid is available to pay these expenses.

In both publications we report trend data in both constant (inflation-adjusted for 2000–2001) and current dollars. The inflation adjustment promotes accurate interpretation of trends, controlling for the variable purchasing power of the dollar over time.

The objective of this report is to assemble the most complete, comparable, and reliable statistics on student financial aid. Tables 1 to 10 and Figures 1 to 9

provide a variety of data for the period 1990-91 through 2000–2001. Appendix tables A and B provide basic program statistics for all years in our database back to 1963-64, for those who wish to calculate trends over longer periods than described in this update. Appendix tables C and D provide disaggregated data for the Federal Family Education Loan Program (FFELP) and the Ford Direct Student Loan Program (FDSLP).

To put financial aid trends in context, we also provide selected data from *Trends in College Pricing*, including changes in undergraduate tuition and fees, total costs of attendance, and incomes of families most likely to have children in college. To gauge the extent to which college is becoming more or less affordable, one must look at all three measures (price, family income, and available aid) together.

As always, we continue to refine our coverage of programs and update previously reported statistics when better data become available. Therefore, this update replaces previous *Trends in Student Aid* publications.

Limitations of the Data Collection

This survey covers only direct aid to students, not the indirect subsidies that make it possible for institutions to charge less than the actual costs of instruction. State, federal, and local appropriations, as well as private philanthropy to colleges and universities, reduce the prices faced by students in general. While states are the largest contributor of such indirect support, the federal government remains the largest provider of direct aid to help students meet their out-of-pocket expenses, including tuition, fees, living costs, transportation, books, and supplies.

The report does not consistently separate assistance for graduate and undergraduate students, since the available data are not broken out this way for many sources and programs. Likewise, we are unable to capture students' wages from employment that are not the result of formal work-study programs, nor do we attempt to estimate tuition assistance that students may receive from their employers.

Despite these limitations, the survey covers virtually all federal aid and the vast majority of state and institutional assistance available

to students in postsecondary education. Figures for federally sponsored borrowing through the Ford Direct Student Loan Program (FDSLP) and the Federal Family Education Loan Program (FFELP) are based on estimates provided by the U.S. Department of Education. The estimates for institutional aid are necessarily broad approximations, extrapolated from 1995-96 Institutional Postsecondary

Education Data System (IPEDS) data from the Department of Education. The estimates for state aid are also approximations based on our own survey of selected state agencies and cross-checking with data from the National Association of State Student Grant and Aid Programs (NASSGAP).

Loan Trends and Coverage

The most prominent trend in student aid that this survey has tracked since the early 1980s has been the growing reliance on borrowing for higher education. Federal programs have largely fueled this trend. The federal government provides about 70 percent of direct aid to postsecondary students, and almost 60 percent of all aid is now in the form of loans.

Starting five years ago, we broadened our data collection by adding an estimate of nonfederally sponsored borrowing through "alternative" college loan programs. Private and state loan programs for students and parents began to grow in the 1980s as college prices outpaced inflation and federal aid failed to cover the difference. After Congress raised federal borrowing ceilings in 1992, the growth in demand for nonfederal loans may have leveled off, but our annual poll of nonfederal loan sponsors shows an upsurge in the market for alternative loans. For 2000–2001, we estimate that nonfederal loan volume exceeded \$4.5 billion, up from \$3.8 billion a year earlier and \$1.3 billion five years ago.

The federal government provides the lion's share of direct aid

to students as described in this survey. Approximately three-

quarters of the more than \$74 billion in available student aid

during 2000-2001 was generated by federal appropriations

or loan guarantees. The states, on the other hand, provide a

substantially larger share of operating support for institu-

tions of higher education, which is not covered by this survey. Overall, the federal government contributes about 12 percent

of revenues of colleges and universities, while state govern-

ments contribute twice the federal share.

Federal and State Roles

ERIC

This year's estimate of nonfederal loans includes almost \$4 billion in private loans, and \$550 million in state-sponsored borrowing, the latter financed either by state appropriations or tax-exempt bond issues. About half of the privately sponsored loan volume is for graduate students, while the state-sponsored programs are directed primarily to undergraduates and their families. Interest rates and other terms of these loans vary widely.

Because of the multiple players involved in originating, insuring, and servicing private student loans, there may be some double counting of dollar volume in our poll. At the same time, we know that we have not captured all the activity in this burgeoning market. If anything, we suspect our estimate is on the low side. Privately sponsored student loans remain a small fraction of federal student loan volume, but the demand for alternative sources of credit financing is clearly growing, and is likely to continue to grow, especially so long as Congress keeps a lid on federal borrowing ceilings.

The nonfederal volume estimates do not include credit card financing, conventional consumer loans, or home equity lines of credit. Many families and students use these forms of credit for postsecondary expenses, and recent media reports have spotlighted the growing student use (and abuse) of credit card financing in particular. But we have found no way even roughly to estimate the extent of such residual borrowing.

Tuition Tax Benefits

A major form of non-need-based support was created by the Taxpayer Relief Act of 1997. The Hope Scholarship and Lifetime Learning tax credits took effect in 1998, and are estimated to cost the federal government \$12-15 billion in lost revenue annually once the law is fully phased in, by the year 2002.

These tuition tax benefits are not included in this data collection. Why? First, they constitute tax relief, not student aid, and the relief generally comes during tax season, not when tuition bills are due. Second, data on use of the tax provisions are not likely to be timely or easily accessible. While *Trends in Student Aid* presents data on assistance available during the most recently completed academic year, the IRS may not be able to provide data on use of the tax breaks until two or three years after a given tax year—if at all. We await more information from both the IRS and the Department of Education before deciding whether and how to include tuition-tax benefits in future editions of this survey.

As always, we welcome reader comments and suggestions on ways to broaden the coverage and increase the usefulness of the *Trends in Student Aid* data series. Visit College Board on the Web at www.collegeboard.com for an electronic version of this document and the companion *Trends in College Pricing* 2001.

Kathleen Payea, consultant, conducted the data collection for this *Trends* update and designed the publication. Lawrence Gladieux served as consultant for the analysis and presentation. This publication would not have been possible without the cooperation and support of Lezli Baskerville and Michele Cole of the College Board Washington Office.

Thanks to all those who contributed to the data collection and update of this publication, including state agency and special-aid program contacts, as well as experts from the U.S. Department of Education. Special thanks to Dan Madzelan, Maria Rojtman, Mary Miller, and Steve Carter of the Policy, Budget, and Analysis office of the U.S. Department of Education for their cooperation and support.

What's Covered in This Survey

- O Grants, loans, and work-study assistance explicitly intended to help students and families meet their out-of-pocket expenses for postsecondary education, including tuition, fees, living costs, transportation, books, and supplies.
- O Virtually all such federal aid and the vast majority of state and institutional assistance available to students pursuing postsecondary education.

What's Not

- O Indirect subsidies, especially state operating support for public higher education, that make it possible for institutions to charge less than the actual costs of instruction.
- O Student wages that are not the result of formal work-study programs.
- O Employer-paid tuition assistance.
- O Use of credit cards, consumer loans, or home equity lines of credit to finance postsecondary expenses.
- O Tax incentives that benefit students and parents in saving and paying for higher education.

IHIGHILIGHTS

Total Ald

Available student aid topped \$74 billion in 2000–2001, an increase of 7.1 percent over the preceding year, or 3.5 percent after adjusting for inflation. (Tables 1 and 2; Figure 1)

Ten-Year Trend

Over the past decade, total aid has almost doubled in constant dollars. However, the growing reliance on loan programs was responsible for two-thirds of this increase. (Tables 1, 2, and 6; Figure 1)

Loans vs. Grants

Loan aid has increased by 136 percent during the past decade in constant dollars, while grant aid has increased by 64 percent. Loans comprise 58 percent of total aid available to students, compared to 49 percent 10 years ago, and 41 percent in 1980–1981. Over the past quarter century, federal student aid has drifted from a grant-based to a loan-based system, producing a sea change in the way many students and families finance postsecondary education. (Table 6; Figure 5)

Unsubsidized Sums Student use of the unsubsidized loan option, introduced in 1992–1993 and available to students regardless of need, continues to grow, while borrowing in the subsidized loan program has leveled off. The latter is subsidized in that the government pays the interest while borrowers are enrolled, while for unsubsidized loans, in-school interest charges are added to the borrower's total cost. Unsubsidized borrowing, by students (Stafford Unsubsidized) as well as parents (PLUS), now accounts for more than \$18 billion, almost half of federal education loan volume. (Tables 1, 2, and 4b; Figure 4)

Everanteed Guaranteed Locaus The Ford Direct Student Loan Program (FDSLP), in which students borrow directly from the federal government through the institutions they attend, competes with the Federal Family Education Loan Program (FFELP), in which students may choose to receive their loans from private lenders guaranteed by the government. The FDSLP's share of loan volume was just under 30 percent in 2000–2001. (Tables 1, 2; Appendix C/D)

Parent Loans

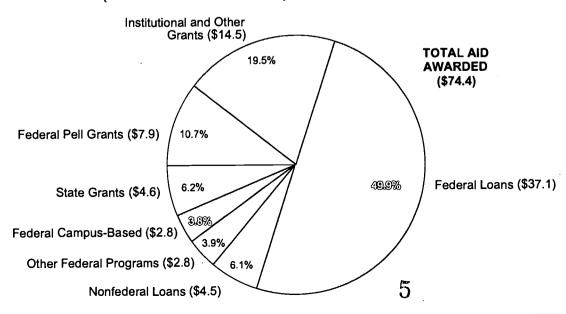

Borrowing through the federal Parent Loans to Undergraduate Students (PLUS) program rose 5 percent in 2000-2001 after adjusting for inflation. Since 1992-1993, PLUS volume has increased by almost 160 percent. In 2000-2001 the average PLUS loan amount was \$7,209, up more than 75 percent since 1992-93, again adjusting for inflation. (Tables 2 and 4b)

Nonfederal Loans Nonfederal borrowing totaled \$4.5 billion in 2000–2001, up 15 percent over the previous year. While the amount of nonfederal borrowing is small compared to the \$38 billion in federal education loans, large increases over the past four years reflect a growing interest in and reliance on alternative methods of paying for college. (Tables 1 and 2; Figure 2)

Pall Grants

Recent increases in Pell Grant appropriations have helped to stabilize the overall loan-grant balance in the aid system. Yet the maximum Pell, at \$3,300 in 2000–2001, remains far below the purchasing power it had two decades ago. Originally designed as the foundation for student aid packaging, the maximum Pell Grant now covers 40 percent of the average fixed costs (tuition and fees, room and board) at a four-year public college and only 15 percent at a private four-year college. (Tables 4a and 7; Figure 6)

FIGURE 2. Estimated Student Aid by Source for Academic Year 2000–2001 (Current Dollars in Billions)

State Grant Programs

While providing 6 percent of total student aid, state grant funding has increased by 90 percent during the past 10 years after adjusting for inflation. Federal matching through the LEAP (Leveraging Educational Assistance Partnership, formerly SSIG) program contributed \$31 million to state need-based grant programs in 2000-2001, down 60 percent compared to a decade ago. (Tables 1 and 2; Figure 2)

Institutional Ald

Institutional grants account for nearly 20 percent of total available aid. Since 1990-91, the estimated amount of institutional grant assistance has almost doubled in constant-dollar value. (Figure 2; Table 2)

Affordability Caps

Tuition increases outpaced growth in personal and family income during the 1980s and 1990s. While inflation-adjusted tuition was essentially flat in the 1970s, average tuition at both public and private four-year institutions more than doubled from 1981 to 2000. At the same time, median income for families most likely to have children in college (parents aged 45–54) has been relatively stagnant, rising 27 percent since 1981. Median family income, however, tells only part of the story, because incomes steadily grew less equal during the 1980s and 1990s. The share of family income required to pay college costs has increased for many families, but it has gone up the most for those with low to moderate income. (Table 3; Figure 3; see also *Trends in College Pricing 2001*)

Over this same period, 1981–2000, aid per full-time equivalent (FTE) student increased in total value but did not keep pace with growth in tuition levels. Looking at the 10-year period, 1990–2000, growth in aid per FTE exceeded growth in tuition. However, this growth in aid came largely in the form of loans. (Table 8; Figure 7)

Need vs. Noo-Need Ald The proportion of federal aid that is awarded on the basis of need has been declining since the mid-1980s, primarily because of the growth in unsubsidized, non-need-based borrowing. While need-based assistance accounted for about 80 percent of all federal aid a decade ago, it now accounts for less than 60 percent. (Figure 8)

More than three quarters of state financial aid remains need-based, but especially since the early 1990s, the states have taken a sharp turn in the direction of non-need merit scholarships. Non-need state aid has grown 336 percent while need-based aid has grown 88 percent since the National Association of State Student Grant and Aid Programs began to track non-need aid separately in 1982. (Figure 9)

Parallel trends in the distribution of institutional aid reflect rapid growth of spending on merit and other non-need-based aid at a wide range of institutions, as well as a shift in need-based awards to more affluent students. The largest increases in average institutional grants at private institutions in the 1980s and 1990s were for middle-income and high-income rather than low-income students. (Table 9)

FIGURE 6. The Maximum Pell Grant as a Share of Cost of Attendance, 1973-1974 to 2000-2001

Note: Until 1986 the Higher Education Act limited the Pell Grant award to no more than 50% of a student's cost of attendance. That limit was increased to 60% from 1986 to 1992, and thereafter it was removed altogether.

^{*}Beginning in fiscal year 1992, the Federal Credit Reform Act of 1990 changed the cost accounting for federal credit programs, including Ford Direct Loans and Family Education Loans. Previously, outlays represented cash payments to program participants, including special allowances to participating lenders, in school interest benefits to lenders on behalf of borrowers, and default reinsurance payments to guarantee agencies. Starting in 1992, outlays reflect present-value calculations of the anticipated cash flows for the cohort of loans in the given fiscal year.

Notes and Sources

TABLE 1

Federally Supported Programs

Several of the federally supported programs include small amounts of funding from sources other than the federal government. For example, Federal Work-Study (FWS) includes contributions by institutions, although most of the funds in the program are federal. Perkins Loans (until 1987 called National Direct Student Loans or NDSL) are funded from federal and institutional capital contributions as well as collections from borrowers.

Generally Available Aid

LEAP. Formerly known as the State Student Incentive Grant (SSIG) program, the Leveraging Educational Assistance Partnerships monies reported under federally supported aid include federal monies only; the state share is included under the "state grants" category. Likewise, institutional matching funds required by the Supplemental Educational Opportunity Grant (SEOG) program since 1989 - 1990 are reported under "institutional and other grants."

ICL. The Income Contingent Loan Program was discontinued after 1992-1993.

FDSLP. The Ford Direct Loan Program began disbursing loans in academic year 1994-1995. includes Stafford Subsidized and Unsubsidized Loans and Parent Loans for Undergraduate Students (PLUS). Under this program, loans are provided directly to students by the federal government, using funds from the U.S. Treasury. Data for the 1999-2000 year are estimates based on preliminary calculations from the Policy, Budget, and Analysis Staff, U.S. Department of Education.

FFELP. The Federal Family Education Loan Program (until 1992 Guaranteed Student Loans), which includes Stafford Subsidized, Unsubsidized, and PLUS loans (also included Supplemental Loans for Students, SLS, until 1994 – 1995), relies on private sources of capital. The federal government subsidizes interest payments and guarantees repayment of defaulted loans. Until SLS was created by the 1986 Amendments to the Higher Education Act, supplemental loans were provided to students under the Auxiliary Loans to Assist Students (ALAS) program. The SLS program was discontinued after the 1994-1995 academic year.

Specially Directed Aid

Veterans. Benefits are payments for postsecondary education and training to veterans and their dependents authorized under Chapters 30, 31, 32, 34, 35, and 106 of the U.S. Code. Federal contributions to Chapter 34, the Veterans' Educational Assistance portion of the Post-Korean Conflict Educational Assistance Programs, were terminated in 1990. After 1990, remaining eligible veterans were funded through Chapter 30.

Military. Expenditures for education are reported for three types of programs: the F. Edward Hebert Armed Forces Health Profession Scholarship Program, Reserve Officers' Training Corps programs for the Air Force, Army, and assistance for the active duty Armed Forces.

Other Grants. Includes Higher Education Grants for Indian Students, Fellowships for Indian Students (last funded in 1995-1996), American Indian Scholarships, Indian Health Service Scholarships, National Science Foundation predoctoral fellowships (minority and general graduate), National Health Service Corps Scholarships, National Institutes of Health predoctoral individual awards, including Nursing Fellowships (Nursing funding ended in 1984-1985), fellowships awarded through the Council on Legal Educational Opportunity (last funded in 1995-1996), the Jacob K. Javits Fellowship Program, the Robert C. Byrd Honors Scholarship Program (last funded in 1994-1995), and college grants provided to volunteers in the Americarps national service programs (funding began in 1994-1995).

Other Loans, Includes amounts loaned under the Health Professions Student Loan Program, the Health Education Assistance Loan Program, and the Nursing Student Loan Program.

State Grant Programs

The state grant amount for 2000-2001 is based on projections by the 20 states that award approximately 90 percent of state grant funds and estimates for the remaining 30 states and the District of Columbia made by the College Board. Previous data is updated using the NASSGAP Annual Survey.

Nonfederal Loans

Estimates based on an informal College Board poll of the largest nonfederal loan sponsors; includes estimates of private and state-sponsored volume for the past four years.

Institutional and Other Grants

Institutional awards include, in addition to awards from the institution's own funds, scholarships, fellowships, and trainee stipends from government and private programs that allow the institution to select the recipient. Data since 1996-1997 are estimates based on 1995-1996 IPEDS data.

Constant dollar figures are based on data from Table 1. See page 23 for a more complete explanation of constant-dollar conversions.

Cost of attendance data are from the College Board's Annual Survey of Colleges, and include tuition, fees, and on-campus room and board costs. Because community colleges generally do not offer on-campus housing, cost of attendance figures are not reported for these institutions. Note that cost of attendance and tuition averages apply to undergraduate costs only, and are weighted by enrollment to reflect average costs to the student rather than average charges by the institution. Tuition is based on 30 semester or 45 quarter hours; room and board figures are for the academic year and assume double occupancy in a dormitory room and the maximum meal plan.

Median family and household income are from the Appendix A U.S. Department of Commerce, Economics and Figures on military-related aid are not precisely

Navy/Marines, and higher education tuition Analysis (www.census.gov/hhes_/income/). Income data are for the calendar year in which the academic year begins. Disposable personal income, median family, and household income data for the 2000-2001 year are estimated figures.

TABLES 4a and 4b

The number of recipients of LEAP and state grants and the average award include only undergraduate recipients of each state's primary need-based programs. Comparable figures for 2000-2001 are not available.

1992-1993 was the first year of the Stafford Unsubsidized program, 1994-1995 was the last year of the SLS program. Through coincidence only, 1994-1995 was also the first year loans were made by the Ford Direct Loan Program.

The numbers of loans in SLS and PLUS programs in 1985 - 1986 had to be estimated from fiscal year data.

TABLE 5

"Four-vear" institutions include nonprofit institutions offering Bachelor's and/or graduate degrees. "Two-year" institutions include nonprofit institutions of any other program length from six months to three years. "Proprietary" refers to private for-profit institutions.

The Stafford Unsubsidized Loan program first began disbursing funds in 1992-1993. Beginning in 1994-1995, loan distribution figures include Stafford Subsidized, Stafford Unsubsidized, and PLUS loans made through both the Federal Family Education Loan Program and the Ford Direct Loan Program.

Based on data from Tables 1 and 2. The "grants" category includes Pell Grants, SEOG, LEAP, Veterans Benefits, Military Expenditures, Other Grants, State Grant Programs, and Institutional and Other Grants. "Loans" includes all remaining programs except FWS, which makes up the "work component.

The 1992 reauthorization of the Higher Education Act eliminated the percent cap on college costs beginning in 1993-1994. The constant dollar values reflect a fiscal year CPI adjustment.

TABLE 8

FTE data from Table 203, Digest of Education Statistics 2000. FTE data is for fall enrollment, all institutions. Enrollment data for 1999-2000 and 2000-2001 are estimated by the College Board.

Based on analysis of National Postsecondary Student Aid Study (NPSAS) data by Michael McPherson and Morton Schapiro, in Access Denied: Restoring the Nation's Commitment to Equal Educational Opportunity, a Report of the Advisory Committee on Student Financial Assistance, February 2001.

Data from the U.S. Department of Education Budget reports, unpublished.

Statistics Administration, Bureau of Economic comparable to Table 1. Armed Forces tuition

assistance amounts are not available for these Acronyms years, and some ROTC data are estimated. See notes to Table 1 for further details.

Appendix B

Constant dollar figures are based on data in Appendix A. For an explanation of constant dollar conversions, see details in the following PLUS = column.

FIGURES 1 AND 2 Based on Tables 1 and 2.

Academic Year 2000 = 2000-2001 "Federal Campus Based" aid includes SEOG, FWS, and Perkins Loans.

"Federal Loans" includes Federal Family Education Loans and Ford Direct Loans. "Other Federal Programs" includes LEAP, Military and Veterans' aid, Other Grants, and Other Loans.

FIGURE 3

Based on data from Tables 2, 3, and 8.

Median family income data for the 45-54 age category is used because it is more representative of families with dependents in college. This statistic is not representative of independent students.

FIGURE 4

Based on data from Table 2.

Based on Table 6 data and College Board historical data not printed in this publication.

"Loans" include FFELP, FDSLP, Perkins Loans, ICL, other federal loans, and nonfederal loans as surveyed for this report.

"Grants" include Pell, SEOG, LEAP, Veterans grants, Military grants, State grants, Institutional and other grants, and miscellaneous grants.

"Work" includes Federal Work-Study (FWS).

Based on Tables 3 and 7, and historical cost of attendance data from the College Board (1986-87 on) and the National Center for Education Statistics (pre-1986-87).

FIGURE 7

Based on Table 8.

FIGURE 8

Based on data from Tables 1 and 2. Need-based aid includes Pell, SEOG, LEAP, FWS, Perkins, ICL, FDSL Subsidized, and FFEL Subsidized. Nonneed based aid includes FDSL Unsubsidized and PLUS, FFEL Unsubsidized, PLUS, and SLS and all specially directed aid.

National Association of State Student Grant and Aid Programs (NASSGAP), by Donald E. Heller, University of Michigan.

Definitions

Academic year: July 1 to June 30

Federal fiscal year: October 1 to September 30

General Notes

- Details may not add to totals due to rounding.
- Aid is reported by the academic year in which it is awarded. When necessary, fiscal year data are converted to the academic year equivalents by reassigning the July through September expenditures.
- For a more detailed description of the programs and past trends, see Trends in Student Aid: 1963 to 1983.

A Note on Constant Dollar Conversion

The Consumer Price Index for all urban dwellers (the CPI-U) is used to adjust for inflation. Updated CPI data are available from the Bureau of Labor Statistics Web (http://stats.bls.gov/cpihome.htm). This year, due to the availability of federal data by academic-year rather than the federal fiscal-year, we used an academic base-year calculation in most cases. The academic base year for 2000-2001 was calculated using CPI data for the months inclusive of July 2000 to June 2001.

Formula for Constant Dollar Conversion

| CONSTANT | _ | CURRENT | · · | CPI for the base year |
|------------------------|---|-----------------|-----|--------------------------|
| (base year) Dollars | _ | year dollars | ^ | CPI for the current year |

Consumer Price Indexes: (1982-84=100)

| Ac | adem <u>ic Y</u> | 'еаг | _Ca | lendar Ye | еаг |
|---------|------------------|--------|------|-----------|--------|
| Year | CPI | Factor | Year | CPI | Factor |
| 1990-91 | 133.9 | 1.3075 | 1990 | 130.7 | 1.3178 |
| 1991-92 | 138.2 | 1.2669 | 1991 | 136.2 | 1.2643 |
| 1992-93 | 142.5 | 1.2285 | 1992 | 140.3 | 1.2271 |
| 1993-94 | 146.2 | 1.1975 | 1993 | 144.5 | 1.1919 |
| 1994-95 | 150.4 | 1.1641 | 1994 | 148.2 | 1.1616 |
| 1995-96 | 154.5 | 1.1333 | 1995 | 152.4 | 1.1299 |
| 1996-97 | 158.9 | 1.1018 | 1996 | 156.9 | 1.0978 |
| 1997-98 | 161.7 | 1.0825 | 1997 | 160.5 | 1.0727 |
| 1998-99 | 164.4 | 1.0650 | 1998 | 162.9 | 1.0572 |
| 1999-00 | 169.1 | 1.0354 | 1999 | 166.4 | 1.0348 |
| 2000-01 | 175.1 | 1.0000 | 2000 | 172.2 | 1.0000 |

Based on analysis of annual survey results of the The above table provides academic and calendar year CPI data. The factor column provides the user with a multiplication factor equal to that of CPI (base year) divided by CPI (current year), as illustrated in the right-hand side of the above equation. A simple multiplication of the current year figure by the associated factor will yield a constant-dollar result.

Benefits Program series (annual publication for each fiscal year), Office of Budget and Finance, U.S. Veterans Administration and unpublished data from the same agency.

Trends in Student Aid

This report provides the most recent and complete statistics available on student aid in the United States, complementing the publication by Gillespie and Carlson, *Trends in Student Aid*: 1963 to 1983 (New York: The College Board, 1983) and replacing previously published updates. It revises figures presented earlier for the 1990s and provides estimates for academic year 2000–2001.

The College Board is grateful to the many staff members in public and private agencies who contributed the basic data, as well as their insights and expertise.

The Washington Office of the College Board conducts and disseminates research relevant to public policy issues in education. The office is located at 1233 20th Street, NW, Suite 600, Washington, DC 20036. Phone 202 322-5900.

Additional copies of this report, item #992992, may be ordered for \$15 each from College Board Publications, Box 336, New York, NY 10101-0336. Please add \$4 for postage and handling. Credit card orders may be placed by calling 300 323-7155 Monday through Friday, 8 aun. to 11 p.m. (ET). For additional information call College Board Publications Customer Service at 212 713-3165 Monday through Friday, 9 a.m. to 5 p.m. (ET). Purchase orders over \$25 are accepted.
